EXPERIENCE

Full Stack Developer

Addison Lee

-  10/2022 - 05/2026
- Developed and maintained responsive websites, landing pages, and custom frontend templates using WordPress, ACF, JavaScript, PHP, HTML, and CSS
 - Built reusable frontend components focused on performance, responsive design, UX, and SEO optimisation
 - Managed staging and production deployments using Git-based workflows and collaborated with marketing teams and third-party developers to deliver website enhancements and digital campaigns
 - Integrated third-party tools including Freshdesk forms, chatbots, and lead-generation functionality while supporting local development environments using Node.js and Vagrant

Front End Developer

Y-Wilson

-  07/2022 - 10/2022
- Developed an interactive React-based Sudoku game focused on responsive frontend functionality, reusable components, and cross-device usability
- Built reusable React components and interactive game functionality using JavaScript and component-based architecture
 - Developed timer logic, drag-and-drop interactions, and responsive gameplay features across desktop and mobile devices
 - Implemented responsive layouts and frontend interactions focused on usability and smooth user experience
 - Worked closely with stakeholders to deliver frontend functionality and interactive user experiences

Front End Developer

Nteractive

-  10/2021 - 06/2022
- Developed responsive event and campaign web experiences for global brands including Gartner, Hewlett Packard, and New Balance
- Built and maintained responsive frontend event pages and branded digital experiences across multiple campaigns
 - Developed interactive website elements and layouts using HTML, CSS, JavaScript, and CMS platforms
 - Collaborated with design and marketing teams to deliver engaging user experiences and digital campaign assets
 - Produced frontend visuals, animations, and branded web assets aligned with client requirements and event campaigns

Front End Developer

Ocean Media Group

-  10/2019 - 09/2021
- Developed and maintained event websites, landing pages, and digital campaign assets across multiple brands and content platforms
- Designed and developed responsive event websites and landing pages focused on user experience and campaign performance
 - Built and maintained WordPress themes and templates using Advanced Custom Fields (ACF)
 - Worked across multiple CMS platforms delivering frontend updates, content integrations, and website improvements
 - Collaborated with marketing and design teams to deliver digital campaigns, email assets, and branded web experiences
 - Developed frontend layouts and interactive website elements using HTML, CSS, JavaScript, and jQuery

EXPERIENCE

Full Stack Developer

St John's Laboratory Ltd

📅 09/2018 - 09/2019

Worked on Magento ecommerce development, responsive frontend redesigns, and performance optimisation across the company website and digital platforms

- Redesigned and developed responsive frontend pages including the homepage, antibody validation pages, and blog layouts
- Supported the migration of the company ecommerce platform from Magento 1.9 and helped establish staging environments for testing and deployment workflows
- Analysed, debugged, and tested frontend and backend functionality across staging and production environments
- Built responsive layouts and interactive website functionality using Bootstrap, JavaScript, jQuery, HTML, and CSS
- Optimised database queries and website performance to improve page speed and overall user experience
- Managed website administration, user permissions, and regular website/database maintenance

Senior Full Stack Developer

Registry Trust Ltd

📅 11/2013 - 08/2018

- Built and maintained multiple company websites using WordPress and Joomla within an Agile development environment
- Developed portal functionality to dynamically display client shareholdings, investments, and reporting data
- Led and supported digital projects while mentoring and managing junior developers

Web Developer

Regus

📅 03/2011 - 10/2013

- Developed landing pages and microsites using ASP, HTML, CSS, and MySQL
- Maintained company websites, resolved frontend issues, and deployed website updates across digital platforms
